DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "27" has been used to designate two distinct pins. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,730,012 to Juy (Juy '012).

Juy '012 discloses in figure 2, a derailleur comprising a fixed member 1 having a first mounting flange (not numbered) and a second mounting flange (not numbered) wherein said first and second mounting flanges have different axial widths; a first link 4 located within an attachment portion 1b of said fixed member; a second link 3; a third link 2; wherein said second link is coupled via a pivot 18 to said first and second mounting flanges; and a biasing member 12.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3682

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-8 and 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Juy '012.

Juy '012 discloses the basic apparatus as previously cited but does not disclose the specific dimensional relationships of the elements. However, the actual dimension is merely a matter of engineering design choice and the level of skill of one of ordinary skill in the art would produce a similar optimization, especially absent any evidence to the contrary, i.e. unexpected results.

Furthermore, it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

In re Aller, 105 USPQ 233 (CCPA 1955).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent documents are cited to further show the state of the art regarding derailleurs in general:

US Patent No. 5,624,336 to Kojima

US Patent No. 5,620,384 to Kojima et al.

US Patent No. 4,627,827 to Juy

European Patent Application EP 0 538 487 A1
